CORNERS

The dreaded corner – it's often viewed as the most difficult, costly and time-intensive element of any wall base installation.

To resolve this issue, we've developed rubber corner blocks. These 100% PVC free, vulcanized and extruded corner blocks alleviate costly hand-scribing, wasted time and extra skilled craftsmen from the corner-forming process. These rubber corners also add durability because they are less likely to get damaged or detached during everyday use and maintenance of the interior space.
